# Eleventh Hour Tricks

Kansas City Man Says Phillips Was Offered \$1,000 to Make Adverse Report on Spavinaw Project.

### (BY A SPECIAL CORRESPONDENT)

Eleventh hour stories, given out too late to be thoroughly answered so that the public understands, have become the order of the day with the opposition to the bond issue. This was, of course, expected. Those who would resert to such tactics in a campaign as these worthies have indulged in could not restrain themselves the added indulgence of such disreputable methods. In older communities such methods invariably receive a rebuke at the hands of the public in the election. It remains to be seen whether Tulus has become afficiently generally a followed. receive a rebuke at the hands of the public in the election. It remains to be seen whether Tulsa has become safficiently grown up to follow her older sisters in putting the stamp of disapproval upon the kind of tactics used by the opposition to this campaign. This discussion has been going on for several weeks, yet the opposition waits until five days before the election to put out a report by Hiram Phillips, an alleged engineer of Kansas City, questioning the plans and estimates of Mr. Pressey. This man Phillips was an applicant for Mr. Pressey's place as consulting engineer here. He offered to do the work for \$3,900 and was promptly discarded after investigation by the civic clubs. A very prominent man here talked Monday over the telephone to an equally prominent man in Kansas City whom he knew was acto an quainted with Phillips. His reply was substantially this: "Is that scamp down there? Rum him out of town. He came to me and told me L. Y. McFarland had offered him \$1.000 to go to Tuiss and make an adverse report on Spavinaw. He asked me what I thought? I told him no reputable man could afford to accept such a commission; that destroy himself. I thought he had abandoued the idea. I am astonisHed.

The writer gives his word that the man who told him this is a repu table man in the community. In view of this we refrain from commenting on the report further than to express our admiration for the talents of a man who can in two days investigate Shell creek and Spavinaw with the necessary detail to make a cock-sure report adverse to that of men who have worked for months in its preparation. dentally we offer a peanut as a prize to the man who can guess who it could possibly be who put up the \$1,000.

But eleventh hour engineers' reports seem to be on the brain of these gentlemen. Monday morning they trotted out an unsigned report from the Tuisa Engineers club. These electric wirers and board draftsmen the Tuisa Engineers club. for local concerns tell Tulsa, without smiling, how to spend or not spend \$5,000,000. These young men saying that Mr. Pressey's figures are too low reminds me of the man who, after three witnesses had testified that they saw him steal the cow, hoped for a preponderance by putting on four witnesses to testify that they did of the testimony not see him steal her.

Their report is too negative to be answered. One wonders why the older and wiser heads in the club allow these young cubs to make the organization ridiculous. Probably almost all of them know that a straight line is the shortest distance between two points, so why are they not capable of making \$5,000,000 decisions? Of course, why not Their bad ethics and evident bad faith are really astonishing. And they all hope when they mature to stand well in their professions. One would like to know which ones are hydraulic engineers and how big the jobs have been which they have constructed.

But the public should not be discouraged. There is more spectacular

staff to come. Think what a joy it will be to spring sensations and scandal when it is too late to talk back. There is Mr. Pressey, for instance. Anybody would know they were going to make an eleventh bour attack on him, although those who lang investigated him thoroughly wonder what it will be. They can find making to his discredit. But a couple of Mr. Page's printers offered to go at their own expense (which means Mr. Fage's, of course) as a committee from the union to investigate rumors of Mr. Pressey having employed scab labor at Oklahoma (ii). They have been very still since their return and are nursing an awful secret. They will find time in a day or two to tell all about it, although they made the trip 10 days ago. Union labor will get a terrible scare about Mr. Pressey. They will forget to say that they found Mr. Pressey was only a consulting engineer supercising the contracts and had not the slightest control over the employ ment of tabor. This is one last minute story. Another is about how full of diamonds or something the basin at Spavinaw, which Tuisa must have, is and how the \$5,000,000 will hardly buy the site, say nothing of building the plant.

We are not prophets or the sons of prophets but we invite the public to watch what kind of guessers we are. We even guess that one or the other of these stonies will be in the current issue of the opposition paper. If we have guessed wrong on what the canard is we have not guessed wrong on whether there will be one or two. Wait and All of which would be rather funny if not so very contemptible. wonder how the public will stand it.

Even Mr. Phillips and the Tulsa Engineers club admit there is plenty of pure water in Spavinaw. Every silly argument advanced by the opposition has been exploded except one. That question some still dehate. It is: "Can Tulsa afford it?"

Tulsa raised more than \$40,000,000 to support the war without ask-

ing that question and her bank deposits are larger than ever. Can wisa afford \$5,000,000 payable in 25 years for her life blood? Why last month the building permits were more than \$2,000,000. When that work is dobe \$2,000,000 will be added to assessable property. Five such months and the added assessable property, will at a far rate of 40 mids, carry the interest and staking fund on the water bonds. Suppose the men taking out these \$2,000,000 of permits had said they could not afford to build now." That is what Mr. Alexander says about the ruins of the Ohio building. Suppose his policy were to prevail Very soon the echo of the footfall of the lonely pedestrian would resound on the streets of Tulsa. Can Tulsa afford it? Can she afford to abandon her growth, her optimism, her young, aggressive spirit? Has she grown great on timidity or upon sone daring? Who is there having property at stake who dares to say that Tulsa cannot afford it?
